FORENSIC MEDIA AUTHENTICATION REPORT

Multimodal Facial Forgery & Hemodynamic Integrity Analysis

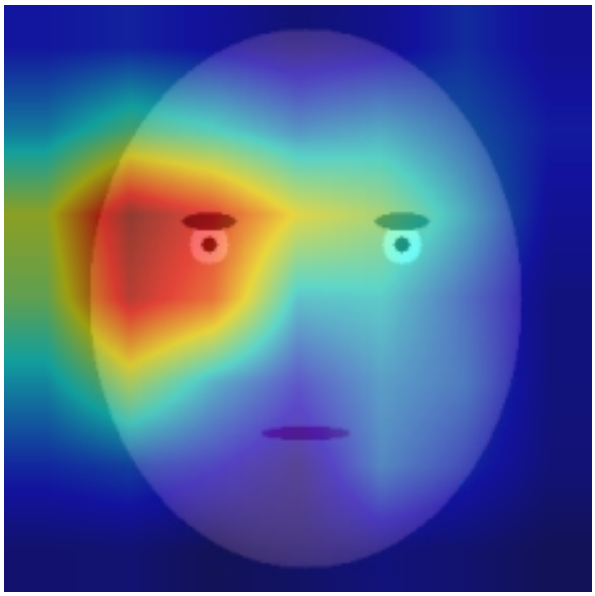

Inspection Date:	2026-11-09 19:59:37 UTC	**Analysis Mode:**	ADVANCED
Primary Verdict:	**REAL (94.8% confidence)**	**Video Hash:**	e3b0c44298fc1c149a...

Multimodal Forensic Findings

Forensic Stream	Methodology	Observed Indicator	Diagnostic
Spatial (CNN)	EfficientNet Feature Maps + Grad-CAM	Boundary discontinuity & warping	Natural Texture
Temporal (LSTM)	Bi-LSTM Sequence Attention	Inter-frame continuity check	Stable Progression
Physiology (rPPG)	POS Hemodynamic Pulse & Welch PSD	HR: 119.5 BPM | SNR: -2.0 dB | Coherence: 0.57	Synchronous Cardiac Pulse

Spatial Artifact Attribution (Grad-CAM Heatmap)

Highlights pixel regions exerting maximal positive influence toward the manipulation classification:

Investigative Advisory: This automated forensic report combines spatial convolutional feature learning, recurrent temporal analysis, and remote photoplethysmography. Advanced mode verifies physiological cross-regional blood volume pulse coherence. Results should be reviewed in conjunction with chain-of-custody metadata.
